

INTRODUCING

Antonio

I was 19 years old when I had my accident. I was driving to work on a cold and wet morning when my car slipped in oil on the road. The car spun out of control and finally rolled. The accident left me with serious injuries, including damage to my spinal cord which resulted in quadriplegia.

After my accident I spent the next 11 months in hospital and in rehabilitation recovering, rebuilding my life and learning to do everything for myself again.

These days what motivates me is to be as independent as possible. I feel that with the right attitude I can overcome anything.

I have modified my car and I am driving again now. I'm also getting back into work and I still have a love for music. My new passion for wheelchair rugby.
